

I don't think the FCC should implement any proposal that would lessen Indiana's Telephone Privacy law protections. I work a 12 hour shift, 4 days on and 4 days off, and while I'm working I have to get up at 3:30 AM so I go to bed very early and before the law went into effect I got lots of phone calls from telemarketers after I had went to bed. Not only did they effect my sleep, but my mind was not clear on what they were trying to sell me.
